Dear HR Manager,

I am writing in response to the advertisement posted for the position of your organization. As an experienced software engineer with expert knowledge in C, Java, JavaScript, HTML, CSS, and databases like MySQL and MongoDB, I feel confident that I am the right person to help the organization reach the next level of success.

I offer 1 years of development experience in JavaScript and React based web applications, a strong aptitude for learning new technologies, and a proven track record of meeting aggressive goals. My most notable skills include software development, web development, project management, and communication skills acquired from RevoKarmaHub Software And Services working as a Junior Software Developer. I bring over 1 years of experience in developing websites for multiple clients in various environments during my Bachelors while working on different projects. I possess a solid knowledge of web developing platforms and frameworks like Bootstrap which I have acquired at my entry level experience as a junior level developer. I have been successful in providing high-level technical direction to drive projects from conception and design through QA and deployment. I am comfortable communicating with technical and non-technical employees throughout the company.

I also possess advanced knowledge of the languages and project management techniques through postgraduate studies. The courses like Data Security and Cryptography, Network Security, etc. had enhanced my acquaintance and consideration for the security of computers and its data. This further initiated my interest in Quality Assurance. Technology Entrepreneurship taught leadership, management and group tasks. Overall, this courses had not only created awareness related to some areas but had refined the fundamentals to the next level. Further, I have achieved confidence working in a team through full-time. Receptionist at st. Michael Physio Clinic and Team Member at Tim Hortons served a greater part in my communication skills and leverage to understand different people's stability.

Overall, I feel that my knowledge as a programmer and my passion for new technologies makes me the ideal candidate to meet your development needs. I would be glad to discuss my abilities and background with you in more detail. Provided is the resume that will precisely define my skills and experience. Thank you for your time and consideration.

Sincerely,
Divya Patel.
